**GAB Titan GmbH** was established in 1959 in Solingen, Germany.

From 1959 to 2012 GAB was producing galvanic equipment for customer all over Europe.

In 2012 GAB Titan GmbH became part of Titanium Consulting & Trading Srl, one of the European leading stockholder.

We are serving the industrial, chemical, medical, automotive and consumer markets with semi-finished products and fabricated units in titanium and its alloys.

For the **additive industry** we became one of the leading suppliers for titanium substrate build plates.

The plates we are supplying are produced according to our own in-house specification and its special heat treatment makes our product unique during the printing process.

We carry a wide range of intermediate stock in Germany to produce cut blanks or machine the blanks acc to your printer requirement with lead time of secure interests.

We are supplying Titanium wire with special chemistry for wire feed 3d printing.

A wide range of different chemical compositions for different applications.
